THE FAX THAT WON'T LET YOU DOWN

The Gestetner F270 incorporates all the features you need to speed through daily fax communications. And, thanks to a design that automates almost every aspect of the fax process, everyone can be an expert user from day one.

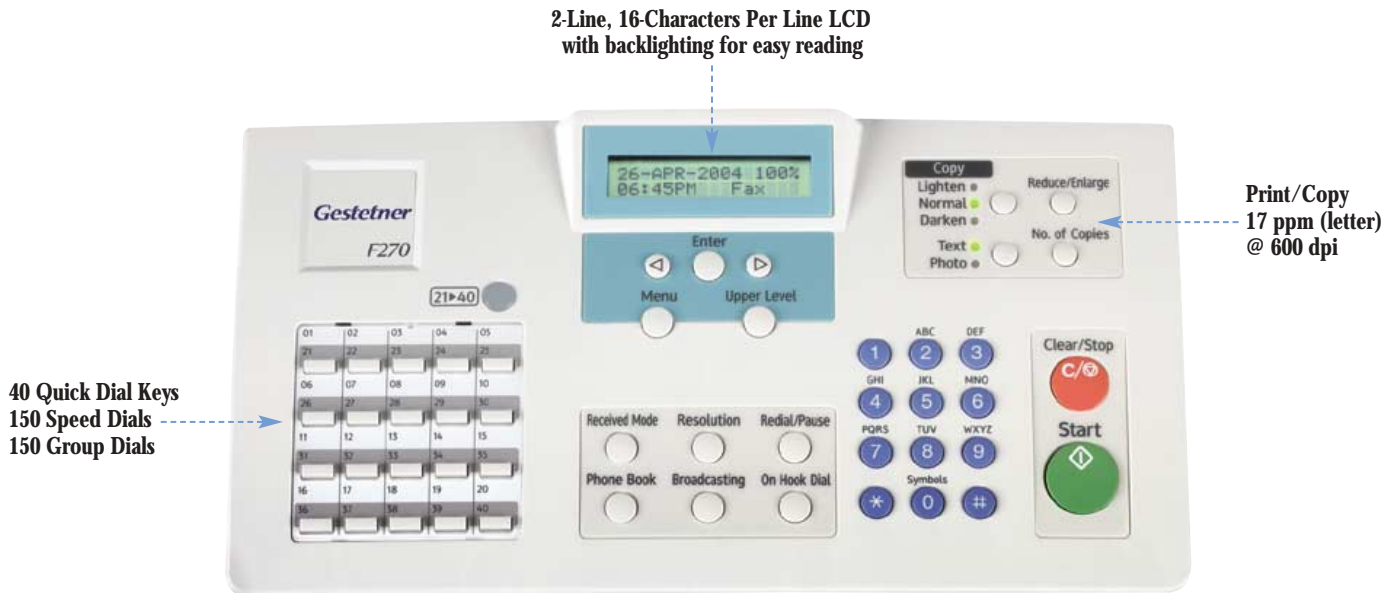

Sending faxes with the F270 could not be easier...simply scan outgoing fax documents at a quick 1.5 seconds per page via the standard 50 page Automatic Document Feeder – and then let the F270's 33.6 Kbps Super G3 modem handle the rest. Your documents will arrive at their destinations in as little as 3 seconds per page, which will considerably lighten your phone bills. And, with the ability to store fax numbers and then recall them at the touch of a button, there's no need to manually input fax numbers.

Receiving faxes is equally simple. Incoming faxes automatically print at a fast 17 ppm at 600 dpi resolution or, if your F270 runs out of paper, they go directly to memory. Once stored, your important business communications are protected from deletion with the F270's 72 Hour Battery Backup, which means that you
